

W.I.R. – Networking for the First World Peace!

W.I.R. (We) are networking for our inheritance, our responsibility, for an eternal federation!

...this feeling...difuse...not tangible...but it is there – like a splinter in your head.

...this indefinable mood, like being fogged: There is something wrong here!

5 ...with the people, with the system, with the world – which surrounds you and me!

Yes, there is definitely something wrong and it is going terribly awry – for people!

But that which really is going awry, will not be shown in the evening news and will not be written about in the newspapers.

W.I.R.

10 share in these and further pages sober facts and sources concerning that which is going awry, what the causes are and how W.I.R. can put these relationships back in order.

50 percent of the labor force in the united economic area of the Federal Republic of Germany are directly or indirectly dependent on this administration in the form of employment and delivery, respectively, service.

15 That means that by currently a good 83 million inhabitants, 41.5 million who are, more or less, aware of that which is going awry – with this administration and its actions.

Especially the officials of the police, the judges, lawyers and their employees and obviously the political-performers are directly associated the administration and know the grievances, which, are hereafter listed and in further pages documented with facts and sources.

- gridlock of the judicature
- party dictatorship
- mercenary army
- sovereignty

unified Germany

page 2 of 4

- existing, but not employed constitutions for the German Peoples
- peace treaty for the 1. World War and its continuation, the Soviet Union excepted
- 25 • unclear situation in respect to nationality
- ...

Despite the assumed 50% of the FRG inhabitants, who more or less know of this precarious situation, there
30 are people in the world, who, independently of this administration, know of these unsustainable conditions
and are expressing them, more or less, in words, pictures and sound and carrying this information to the
world.

These people are estimated by W.I.R., contrary to the estimations of the, so called, security organs of the
administration of the Federal Republic of Germany at about five-million, predominantly in the area of the
former FRG and GDR.

W.I.R. are these millions of people and are standing up to correct precisely these inhumane grievances and,
35 networked with one another, together and peacefully are leading all the people on this Earth in a life-affirming championship (formerly known as society).
